EXPERIENCE

Software Engineer

Telstra

March 2019 – Ongoing

Hyderabad

- Developing Real-Time streaming applications using Spark Streaming on AWS
- Developing API using Java Spring Boot
- Creating custom NiFi processors and fault tolerant NiFi flows
- Developing and maintaining Reporting framework and data lake using Elasticsearch, Lambda, Kibana
- Developing and maintaining UI using Angular and D3.js
- Code performance optimizations, AWS Infra cost optimizations
- Involved in new features and product backlog discussions
- Tasks management using Jira
- Working by Scrum framework

Data Engineer

TechnoMinds Cyber Labs

Jan 2018 – March 2019

Hyderabad

- Involved in product design and architecture
- Developing and maintaining Real-Time streaming platforms using Kafka streams on AWS
- Developing microservices using Spring Boot
- Developing and maintaining frontend using AngularJS
- Containerization of microservices using Docker
- Building custom Logstash ETL configurations and Beats configurations for logs parsing and data extraction
- Maintaining AWS Infra and cost optimizations
- Team mentoring and Code reviews
- Tasks management using Jira
- Working by Scrum framework

Project Engineer

Wipro Technologies

Dec 2016 – Jan 2018

Hyderabad

- Developing and maintaining daemons using Java as per client requirement
- Developing and maintaining E2E diagnostics reporting framework using Java
- Developing and maintaining tools for automating day-to-day support team activities and user Adhoc tasks
- Project and User guide documentations
- Technical assistance to support team and users post application Go-Live

SKILLS

Java Spring Boot Angular Spark
Kafka AWS NiFi Hbase
Elasticsearch Logstash Kibana
PostgreSQL Real-Time Streaming
Hive Hibernate Microservices
Shell script Docker Apache Ignite
Agile Scrum

CERTIFICATES

Secure Code Warrior - Java Spring I Secure Code Warrior

June 2019 – No Expiration Date

AWS Certified Developer – Associate

Amazon Web Services

July 2019 – July 2022

EDUCATION

B.Tech. in Electronics and Communication

JNTU Anantapur – 74.85%

2011 – 2015

Nellore

RECOGNITIONS

- Inspiring Performance – Wipro – Q2, 2016
- Nova Award – Wipro – RnR, 2016
- Voice of Customer – Wipro – Phoenix Team Awards, 2016
- Pragati Recognition Twice – Wipro – 2017
- Best Performer – Telstra – Hudle, 2019

PROJECTS

EOV - End-to-End Order Visibility

Telstra

- The platform collects events from all domain managers involved in an order fulfillment and correlates as per pre-defined configurations in real-time. Order journey visualized in UI based on in-built RBAC. Reporting and Dashboards for showcasing orders and system stats to business in real-time.
 - Techs: Java, Spark, AWS, Spring Boot, Angular, D3.js, Elasticsearch, Kibana, NiFi, EMR, Hbase, PostgreSQL, Splunk, NewRelic, BitBucket
-

Obelus

TechnoMinds Cyber Labs

- AWS cloud-based log analytics product used for Alarming and Monitoring of security, APM, Business Analytics. Correlation Engine for real-time alerting as per user configurations. ThreatIntel for autonomous, robust threat detector using real-world threat feeds in real-time. Investigation module built using Neo4j to get insights from log data to find security breach/hack. Ticketing module for tracking cases internally with customized workflows. Real-time dynamic reports, dashboards generation and inbuilt RBAC.
 - Techs: Java, Kafka, AWS, Spring Boot, Microservices, Keycloak, AngularJS, Apache Ignite, Presto DB, Elasticsearch, Kibana, Logstash, Beats, HighCharts, Docker, GitLab
-

IAC-SOC

TechnoMinds Cyber Labs

- Client: IAC Corp, US
 - SIEM platform built on AWS for alerting regarding breach of pre-configured rules. The platform allows soc analysts to configure rules and reporting, dashboards for monitoring log stats and alerts in real-time. Datalake preparation using Elasticsearch.
 - Techs: Java, Kafka, AWS, Spring Boot, AngularJS, Elasticsearch, Kibana, Logstash, Beats, NVD3, GitLab
-

Wipro-Holmes

Wipro Technologies

- In-House tools development for reducing manual efforts and increasing efficiency. Automated support team activities for BPM domain like reports generation, reconciliation stats generation. Developed tool for scraping daemon logs to get stats of configured regex for client reconciliation purpose. Designed and developed testing tool for weekend and post deployment regression, sanity testing activities without manual intervention. Automated OCR feed flow integrated with BPM workflow reducing manual efforts.
 - Techs: Java, Python, OCR
-

Phoenix

Wipro Technologies

- Client: Genpact, India
- Customizing and supporting Savvion tool for BPM process as per client requirement. Bug fixing and developing daemons required for workflow. Savvion version migration activities, documentations and users post application Go-Live support.
- Techs: Java, Oracle, WebLogic
